

PyroAg® can be applied to all types of crops to help improve both plant and soil health. A versatile natural liquid that directly supports a healthy microbial habitat to maximise your on farm productivity and reduce costs. Some beneficial applications include:

- Improve seed germination
- Feed healthy soil bacteria and microbes
- Promote healthy growth and yields
- Strong deterrent to pests and snails
- Increase natural resistance to disease
- Enhance fertiliser uptake
- Improve composting activity
- Reduce synthetic chemical use
- Improve sugar levels in fruit
- Assist plants with saline soils and frosts

PyroAg® is a quality product that has undergone years of refining, field trials, and university research to ensure its safety.

**PACKAGING:**  
20L, 200L, 1000L

**APPLICATION:**  
Foliar | Fertigate | Soil

#### INSTRUCTIONS

- Always add at specified rates into spray water while agitating and BEFORE mixing with any other additives
- PyroAg® can generally be mixed and sprayed at the same time as your other products - perform jar test first if using with unknown mixes
- Test spray small area for sensitive plants or new applications before full scale spray
- Always use diluted
- PyroAg® contains organic acids with a low pH (2.5-3.5) DO NOT store next to or mix directly with alkaline products, always dilute in spray water first and jar test if new
- PyroAg® is a carbon energy source for beneficial microbes - be careful, mixing or spraying together with live cultures as enhanced microbial activity may produce excess pressure in a closed container.
- Avoid applications around pollination period, the smoky odour can deter bees.

#### DISCLAIMER

Information provided only general recommendations. The buyer assumes all responsibility for the use of any PyroAg® products. Northside Industries Pty Ltd shall not accept any liability whatsoever (including consequential loss) or however arising for any damage, injury or death connected with the sale, supply, use or application of this product except for liability which cannot be excluded by statute.

#### APPLICATION RATES

PyroAg® : Spray Water

#### BEFORE SEEDING

Max concentration 1:200  
Max rate 5L/Ha

#### PLANTING

Max concentration 1:500  
Max rate 5L/Ha

#### POST EMERGENT CROPS / TREES

Max concentration 1:500  
Max rate 5L/Ha

#### COMPOSTING

Max concentration 1:200  
Max rate 1L/m<sup>3</sup>

#### WITH HERBICIDES / PESTICIDES

Max concentration 1:200  
Max rate 5L/Ha

#### FREQUENCY

Maximum every 2 weeks

#### STORAGE

Store in dry cool area out of direct sunlight. Seal lid/cap after use. Do not store mixed.

#### SAFETY DIRECTIONS

Do not swallow. Use in well ventilated area. Avoid contact with skin and eyes. Wash hands after use. Wear gloves, long sleeves and glasses while handling

#### FIRST AID

If ingested, contact a doctor or Australian Poisons information centre on 13 11 26

If in eyes, hold open and flush with water for 15 minutes before seeing doctor.
