## Wood Vinegar

### 80 acres of grapes & 10 acres of greenhouse in Renmark — Wine grapes & vegetables

For Amrit Singh, a proud member of his family business of greenhouse vegetable and wine grape growers in Renmark, South Australia, quality of produce is king.

Since 2007, Mali Produce has been meticulously growing stunning vegetables such as cucumbers and capsicums in their greenhouses as well as red and green grapes for local winemakers. And to create the premium produce which reflects their strong reputation and pride in the business, it is creating the optimum soil environment for their 80 acres of grapevines and 10 acres of greenhouses.

“As a family business, we were committed in handpicking ways to improve our soil health in a sustainable fashion and that meant weaning off pesticides.

**“We pride ourselves as being sustainable farmers, and PyroAg Wood Vinegar is a product that allows us to eliminate pesticides from the equation.”**

“Four years ago, we introduced both our vines and vegetables to PyroAg Wood Vinegar as well as using an integrated pest management system using biological control, to improve the soil. The results were clear.

“Using these two methods of removing the parasites with natural predators as well as spraying PyroAg, we have seen the quality of soil improve as well as the quality of produce being enhanced.

“The plants are clearly healthier, and you can visibly see the positive results with the cleaner root systems.”

“We pride ourselves as being sustainable farmers, and PyroAg Wood Vinegar is a product that allows us to eliminate pesticides from the equation and be the smart option for us to use.

**“We want to give our plants the greatest opportunity to not only survive but thrive as that will mean beautiful and healthy fruit and vegetables.”**
